

Please reject NAB petition 04-160!!!! Satellite Radio has made my morning commute 100 times more enjoyable. I appreciate the competition between regular radio and xm radio/sirius radio. This competition has improved my pleasure with radio. Before XM radio, I never listened to the radio. It was always filled with commercials and music I did not want to listen to. The value and selection that satellite radio has brought to the table is unmatched. Please reject their petition and make them improve their services if they want to compete!!!!
